

## Publish a design

---

### 1 Why publish?

- A design is not available for the study manager until it has been published. Whenever you are ready with the design, click publish. This will first validate the design and if no errors are detected, the version will be locked for editing and published to the Admin-application. All settings are however available in view mode.

**Publish design**

### 2 Unpublish a design

- Unless it has been assigned, a design can be unpublished and unlocked. Go to design settings and click "unpublish" and again to unlock.

#### Design Settings

[Details](#) [Export Design](#)

Locked 2015-09-24 10:40 UTC.  
Design cannot be changed after published.
