

## 🝯 Introduction

## 1 Welcome

- Welcome to the Site User Training program.
- The Site User Training program is an introduction course to Viedoc<sup>TM</sup> for investigators and study nurses. It can also be used as a refresher after training. The program consists of the modules **Overview** and **Patient administration** and will take about 30 minutes to complete. Each module contains several lessons which in turn contain several chapters and steps. Related pictures are attached to the lessons for easier understanding. Images can be clicked to be viewed in full size.
- Please observe that you need to explicitly ask for access to the production area of the study. Do so by confirming that you have received appropriate training. Until the confirmation has been given you will only be allowed to explore the prototype study.

• Finally, please remember that eLearning is always available for training. You can also use eLearning as an instant help by clicking the eLearning icon available at different places within the application (see picture to the right).

## 2 How does it work?

 Viedoc<sup>TM</sup> is an easy to use web-based application. This means that data is entered directly into the system from any computer with Internet access. For more information about system requirements, please see the lesson "System requirements".
